

Installation Guide for opd_Integration

Prerequisites

- Python 3.7 or later
- Odoo 15.0 or later
- Sales Module, CRM Module, Expenses, Inventory, Invoicing

Installation Steps

1. Download the **opd_Integration** module from https://apps.odoo.com/apps/modules/17.0/opd_Integration
2. Copy the downloaded module folder to the Odoo custom directory. The default location for the custom directory is: '/odoo/custom'.
3. Restart the Odoo server to ensure the new module is recognized.
4. Log in to your Odoo instance as an administrator.
5. Go to the Odoo Apps menu and click on the **"Update Apps List"** button to refresh the available modules.
6. Search for **"opd_Integration"** in the Apps menu and click on the **"Install"** button next to it.
7. Wait for the installation process to complete.
8. Once the installation is finished, restart the Odoo server again.

Who can Access the app ?

For Access Right : User for opd_Integration app. : **Settings > Users & Companies> User > Open user > Access Rights Tab > Other > Odoo Pipedrive Integration**

- Select **"Odoo Plugin Admin"**

Scheduler (Changed Time Based on your Requirement)

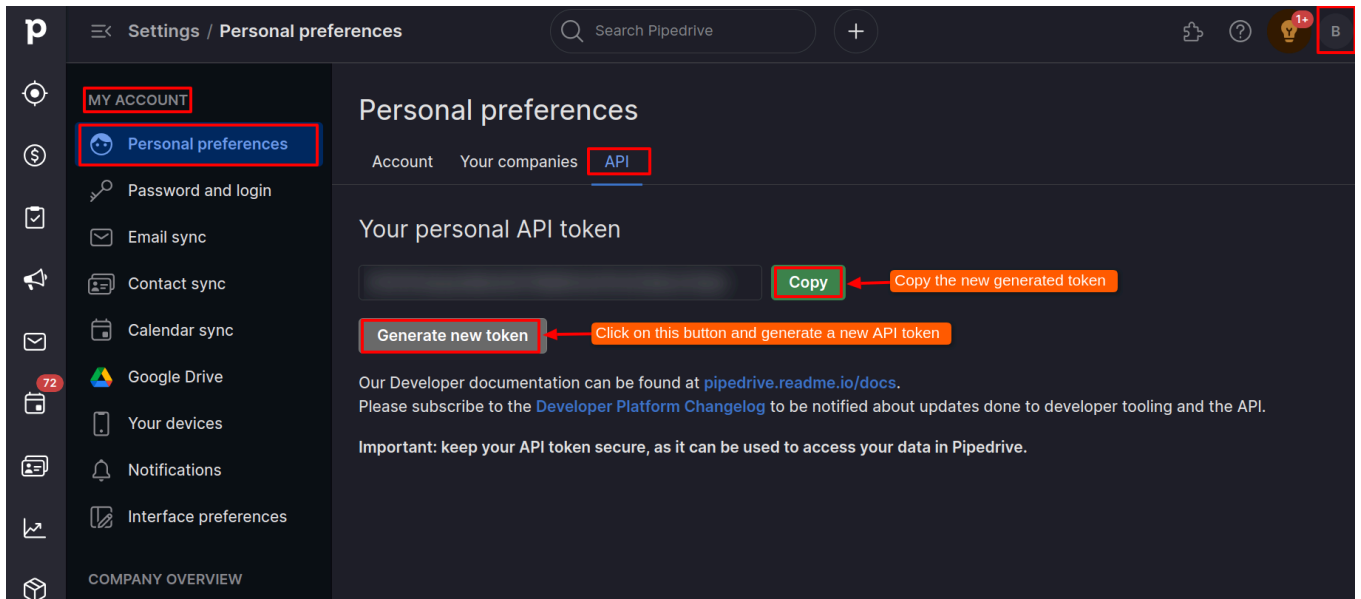

Settings >> Technical >> Automation >> Scheduled Actions

- Fetch Odoo and Pipedrive All Modules Data
- Fetch Related Modules Data
- Fetch Odoo And Pipedrive Activities
- Delete Logger Records

Pipedrive Setup

1. Go to the given link and create a Pipedrive account :
2. Generate New API token by following below screenshot:

<https://xyz-sandbox.pipedrive.com/settings/profile>

3. Create following custom properties in Pipedrive through API:

- **Contacts**
 - odoo_id (field type :text)
 - sync_to_odoo (field type :enum)
- **Companies**
 - odoo_id (field type :text)
 - sync_to_odoo (field type :enum)
- **Leads**
 - odoo_id (field type :text)
 - sync_to_odoo(field type :enum)
- **Deals**
 - odoo_id (field type :text)
 - sync_to_odoo(field type :enum)
- **Products**
 - odoo_id (field type :text)
 - sync_to_odoo(field type :enum)

Odoo Instance Setup
