1. Introduction

opd_Integration : A Powerful Integration App for Odoo and Pipedrive

About the App:

opd_Integration is an innovative integration app that bridges the gap between two industry-leading platforms, Odoo and Pipedrive. With its advanced features and intuitive design, it empowers businesses to automate lead synchronization, establish a two-way data flow, facilitate real-time updates, streamline workflows, and eliminate the need for manual synchronization. By **opd_Integration** integrating these two powerful systems, **opd_Integration** offers unparalleled efficiency and productivity, allowing businesses to focus on what matters most-growing their customer base and driving revenue.

Key Benefits:

- **Automatic Lead Synchronization:**

opd_Integration effortlessly synchronizes leads between Odoo and Pipedrive, ensuring that no valuable customer data is ever lost or duplicated. Any new lead created in either system is automatically propagated to the other, enabling sales and marketing teams to work harmoniously and access up-to-date information at all times.

- **Two-Way Data Flow:**

The app establishes a robust two-way data flow, enabling comprehensive visibility and collaboration between Odoo and Pipedrive. Whether it's contact information, company information, opportunity stages, or communication history, all data is synchronized in real-time, guaranteeing consistency and accuracy across both platforms.

- **Real-Time Updates:**

With **opd_Integration**, changes made in one system are instantly reflected in the other. Any modification to contact details, company details, opportunities, or activities triggers an automatic update across Odoo and Pipedrive, providing

users with the most recent and relevant information. This real-time synchronization enhances collaboration and empowers teams to make informed decisions promptly.

- **Streamlined Workflows:**

By automating data transfer and eliminating the need for manual synchronization, **opd_Integration** streamlines workflows and reduces administrative overhead. Sales and marketing teams can focus on their core activities, confident that their data is seamlessly managed between Odoo and Pipedrive.

- **Manual Synchronization and Automatic Scheduler:**

opd_Integration offers the flexibility of both manual and automatic synchronization. Users can trigger synchronization manually with a single click, ensuring immediate updates when required. Additionally, the app provides an automatic scheduler, allowing users to define regular intervals for data synchronization. This feature ensures that data remains consistently up to date, even when manual intervention is not possible.

Target Audience:

- **Small and Medium-Sized Businesses (SMBs):**

opd_Integration caters to the needs of SMBs that utilize both Odoo and Pipedrive to manage their sales and marketing operations. It provides them with an efficient and cost-effective solution to synchronize leads, streamline workflows, and enhance collaboration between the two platforms.

- **Sales and Marketing Teams:**

The app is specifically designed for sales and marketing teams who rely on Odoo and Pipedrive to drive customer acquisition and revenue growth. **opd_Integration** simplifies their work by automating lead synchronization, ensuring real-time updates, and eliminating the need for manual data entry.

- **CRM Administrators:**

CRM administrators responsible for maintaining data integrity and managing the

integration between Odoo and Pipedrive can benefit from **opd_Integration**. The app simplifies their tasks by providing a seamless and reliable synchronization process, reducing manual effort, and ensuring consistency across both platforms.

- **Business Owners and Executives:**

Business owners and executives who want to optimize their sales and marketing operations can leverage **opd_Integration** to bridge the gap between Odoo and Pipedrive. They can ensure that their teams have access to accurate and up-to-date information, facilitating informed decision-making and driving business growth.

- **Technology and Integration Specialists:**

IT professionals and integration specialists who are responsible for implementing and managing software integrations within organizations can utilize **opd_Integration** to streamline the integration between Odoo and Pipedrive. The app simplifies the integration process and provides a user-friendly interface for configuring and managing data synchronization.

- **Industries with Complex Sales Cycles:**

Industries with longer sales cycles or complex lead management requirements, such as B2B companies, can benefit greatly from **opd_Integration**. The app ensures that critical lead data is seamlessly shared between Odoo and Pipedrive, enabling efficient lead nurturing, tracking, and conversion.

- **Companies Emphasizing Data Accuracy and Efficiency:**

Organizations that prioritize data accuracy, efficiency, and streamlined workflows can find value in **opd_Integration**. By automating lead synchronization, facilitating real-time updates, and eliminating manual data entry, the app helps businesses maintain clean and accurate data across Odoo and Pipedrive, leading to improved decision-making and enhanced productivity.

2. Installation and Setup

We can provide you with installation documents. Check it out.

3. Getting Started

Companies:

In addition to contacts, **opd_Integration** enables the synchronization of company information between Odoo and Pipedrive. Users can efficiently manage company data, such as company names, addresses, industry classifications, and associated contacts. Changes made to company details in either Odoo or Pipedrive are automatically reflected in the other system, ensuring consistency and accuracy across platforms. This integration allows users to gain comprehensive insights into their business relationships and effectively track company interactions.

Here is the screenshot of how the odoo-Pipedrive configuration is done.

5. Odoo-Pipedrive Fields Mapping

- By Clicking the add line button you can add your Mapping of Odoo and Pipedrive Fields.

Contacts:

opd_Integration empowers users to seamlessly synchronize Contacts between Odoo and Pipedrive. With this integration, users can easily access and manage all their contact information in one centralized location. Contacts created/updated in Odoo are automatically synchronized with Pipedrive, and vice versa, ensuring that both systems are always up to date. Users can view, edit, and add new contacts with ease, streamlining their communication and relationship management processes.

Contacts also work the same as companies functionality given above.

Opportunities:

opd_Integration facilitates seamless integration of opportunities between Odoo and Pipedrive, empowering users to effectively manage their sales pipelines. Users can create, update, and track opportunities in either system, with changes automatically synchronized in real-time. This integration ensures that sales teams have access to the latest opportunities information, including opportunities stages, amounts, expected close

dates, and associated contacts. By streamlining opportunities management, **opd_Integration** enhances collaboration between sales and marketing teams, enabling them to close opportunities faster and drive revenue growth.

opportunities also work the same as contacts and Companies functionality given above. and we can add additional features in opportunities.

Leads:

opd_Integration facilitates seamless integration of leads between Odoo and Pipedrive, empowering users to effectively manage their sales pipelines. Users can create, update, and track leads in either system, with changes automatically synchronized in real-time. This integration ensures that sales teams have access to the latest lead information including amounts, expected close dates, and associated contacts. By streamlining lead management, **opd_Integration** enhances collaboration between sales and marketing teams, enabling them to close leads faster and drive revenue growth.

leads also work the same as Contacts and Companies functionality given above. and we can add additional features in opportunities.

Products:

With the "**opd_Integration**" module, seamlessly integrate products between Odoo and Pipedrive, empowering users to efficiently manage their inventory and sales processes. This integration enables users to synchronize product details such as names, descriptions, prices, and quantities across both platforms in real-time. By streamlining product management, the module enhances collaboration between sales, marketing, and inventory teams, ensuring consistency and accuracy in product information. Experience improved productivity and streamlined workflows with the "**opd_Integration**" module for product integration.

Users:

The "**opd_Integration**" module revolutionizes user management by facilitating seamless synchronization of user data between Odoo and Pipedrive. This integration

empowers organizations to maintain consistent and up-to-date user profiles across both platforms, including essential details such as names, contact information, roles, and permissions. By centralizing user management, the module enhances collaboration and communication within teams, ensuring that all users have access to the latest information and resources. With the "opd_Integration" module, organizations can optimize user workflows, improve efficiency, and drive productivity across their operations.

Sync Associations:

The "**opd_Integration**" module introduces a powerful feature known as Sync Association, enabling seamless synchronization of data associations between Odoo and Pipedrive. This functionality facilitates the synchronization of related records such as contacts, companies, opportunities, leads, and more across both platforms, ensuring data consistency and coherence. By establishing robust associations between records, users can effectively track and manage their business relationships, streamline communication, and improve collaboration between teams. The Sync Association feature enhances data visibility, reduces redundancy, and empowers users to make informed decisions based on comprehensive, synchronized data sets. With Sync Association, organizations can maximize the efficiency of their integration between Odoo and Pipedrive, driving productivity and facilitating growth.

4. Key Futures

Hash : A Powerful Integration Future for Odoo and Pipedrive

Description

Data Integrity: Hash functions generate unique hash values or digests for each input data. Even a small change in the input data will result in a significantly different hash value. By comparing the hash values of the original and received data, you can verify if the data has been tampered with or corrupted during transmission or storage. This ensures the integrity of the data and helps detect any unauthorized modifications.

The integration incorporates a "hash future" approach to efficiently manage contact synchronization. When a contact is initially created in Odoo, a hash value is generated based on its data and stored within the Odoo system.

During subsequent contact updates or additions, the integration checks the hash value of the newly received contact against the stored hash value in Odoo. If the hash values are found to be equal, it signifies that the contact has not undergone any significant changes since its last synchronization. As a result, the integration avoids syncing the

contact to Pipedrive, thereby reducing the number of API calls required.

By implementing this hash-based comparison mechanism, the integration ensures that only contacts with modified or new information are synchronized between Odoo and Pipedrive. This optimization helps minimize unnecessary data transfers and API requests, leading to improved efficiency and reduced resource consumption.

In summary, the Odoo-Pipedrive integration you're building uses a hash future technique to track and compare hash values of contacts. This approach allows for selective synchronization, ensuring that only contacts with modified data are transferred between the two platforms, thus optimizing the integration's performance and reducing API calls.

5. Additional Functionality

1. **Sync quick Create/Update a single Contact, Company, Opportunity, Lead, Product in Odoo to Pipedrive using “SYNC TO PIPEDRIVE” button** : Sync a contact/company/lead/opportunity/product in odoo, click the “**SYNC TO PIPEDRIVE**” button in form view of odoo contact/company/lead/opportunity/lead/product.

The screenshot displays the Odoo interface for the 'ABC Company' form view. The top navigation bar includes a 'SYNC TO PIPEDRIVE' button, which is highlighted with a red box. An orange callout box labeled 'Manually Sync Company Odoo To Pipedrive' points to this button. The form view shows various fields for the company, including Address, Phone, Mobile, Email, Website, and Tags. At the bottom, the 'Pipedrive Integration' tab is highlighted with a red box, and an orange callout box labeled 'Pipedrive Integration Tab' points to it. Below this tab, the 'Pipedrive ID' and 'Pipedrive Company ID' fields are highlighted with red boxes, and an orange callout box labeled 'Pipedrive Company ID' points to them.

2. Sync quick Create/Update multiple Contacts, Companies, Opportunity, Leads, Product in odoo to Pipedrive using “Sync to Pipedrive” button
 : Sync a contact/company/opportunity/lead/product in odoo, click the “**Sync to Pipedrive**” button in list view of odoo contact/company/opportunity/lead/product.

The screenshot shows the Odoo Contacts list view. At the top, there's a header bar with 'Contacts', 'Contacts', and 'Configuration' tabs. Below the header, there's a 'New' button and a '12 selected' indicator. An orange callout points to the 'Actions' button with the text 'Click On Action button'. The 'Actions' menu is open, showing options like 'Export', 'Archive', 'Unarchive', 'Duplicate', 'Delete', 'Merge', 'Send email', 'Send SMS Text Message', 'Download (vCard)', 'Grant portal access', and 'Sync To Pipedrive'. An orange callout points to the 'Sync To Pipedrive' option with the text 'Click Sync To Pipedrive For Record Sync Odoo To Pipedrive'. The table below shows a list of contacts with columns: Name, Phone, Email, City, Country, Company, and a 'Sync To Pipedrive' button.
